

# Energizing Innovators

ExxonMobil Chemical Synthetics newsletter

ExxonMobil

## Issue 18 | June 2022

Here's the latest issue of Energizing Innovators, a newsletter providing expert insights into the synthetic lubricants industry. In this issue, we'd like to focus on the synthetic base stocks used in making grease and share with you 2 presentations we delivered at NLGI and STLE in this quarter.

### Formulation solutions

#### Making synthetic grease

According to a 2022 NLGI's study, Synthetic-based greases are growing at a 7 - 10% CAGR which is 5 times of the overall grease growth rates globally. To help you keep up the pace and improve your grease performance, we provide state-of-the-art synthetic base stocks, including SpectraSyn Elite™ metallocene polyalphaolefin (mPAO) and Synesstic™ alkylated naphthalene (AN), which offer better performance compared with mineral oil and conventional base stocks.

[Learn how](#)

#### Presentation

##### Novel basestock technology for EV bearing grease applications

Learn how our advanced synthetic base oils can help improve your grease performance in automotive.

#### Presentation

##### High Performance Greases Toolbox: Synthetic Base Stock Effect

A comprehensive technical presentation that shows how synthetic base stocks can impact the performance of finished greases compared with mineral oils.
