We've got you covered in this issue chockful of packaging news.

Case study | 95% PE-based barrier packaging with improved recyclability* potential and uncompromising package functionality

ExxonMobil and Hosakawa Alpine, Kuraray, and EVAL collaborated to create recyclable* barrier packaging with a very high PE content without compromising on packaging integrity, functionality, or optics.

[Read the case study](#)

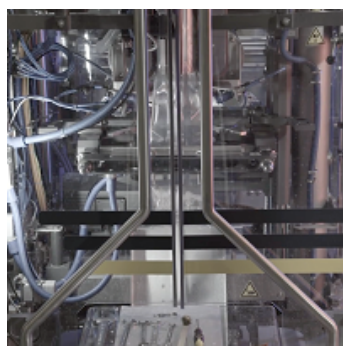

Case study | Full PE thermoformed packaging that can offer recyclability and uncompromising package functionality and optics

See how ExxonMobil, Reifenhauer and Kuraray collaborated to produce a recyclable, thermoformed package with 95 wt% PE content without compromising on functionality or optics.

[Read the case study](#)

Case study | Recyclable* and heat resistant mono-material formulation for flexible packaging

Find out how ExxonMobil performance PE, when used in conjunction with the two component heat-resistant OPV coatings from Siegwerk can result in increased heat resistance and a wider sealing window when used on VFFS machines.

[Read the case study](#)

Case study | Thanh Phu continues plastic circularity journey with certified-circular polymers leveraging Exxtend™ technology

Read about how Thanh Phu, a leading global flexible packaging manufacturer, is using ExxonMobil's certified-circular polymers to create recyclable* mono-material flexible packaging.

[Read the case study](#)

Press release | ExxonMobil, Cyclyx, SEE, and Ahold Delhaize USA team up to help further a plastic circular economy

Together, we're opening new recycling possibilities and helping the packaging industry supply high-performance polymers that help protect perishable foods while supporting a plastic circular economy.
