#### Case study

#### Creating high performance, cost effective vacuum skin packaging formulations

Traditional ionomer-based vacuum packaging can be easily impacted by ionomer material shortages, becoming more expensive to produce. Three companies collaborated to create ionomer-free vacuum skin packaging that is both cost effective and provides high performance attributes.

#### Case study

#### Napco develops heavy duty sacks to pack petrochemical resins as thin as 105 microns

The new film exhibits excellent creep resistance and maintains bag drop performance, which are both critical for load stability, safety and product protection during stacking, storage, and transportation.
