Technical Spotlight

Synthetic base stock innovation

Evolving needs in the engine oil marketplace require formulators to innovate more than ever before. See how we are working on our next generation of low-viscosity, low-volatility base stocks to provide greater formulation flexibility.

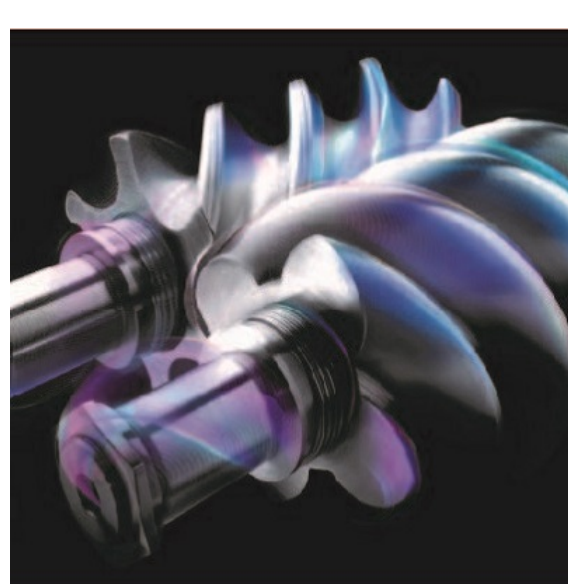

[See the future](#)

[Product Insight](#)
SpectraSyn™ Hi Vis PAO
High viscosity base stock especially suited for industrial oils requiring high stability under harsh operating conditions.

[Product Insights](#)
Synesstic™ AN
Alkylated naphthalene base stock often used as blend component for additive solvency, seal compatibility and hydrolytic stability.

[Learn more](#)

[Product Insights](#)
Esterex™ esters
Organic esters are well-suited as a blend component for additive solvency, seal compatibility or biodegradability.
